# marimba one

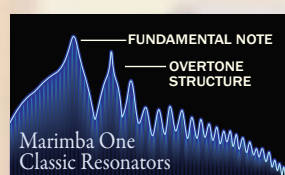

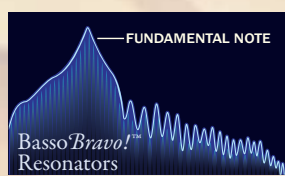

## SOUND OPTIONS

*The Defining Difference... Marimba One®*

### Resonator Options

#### Basso Bravo!™

SPECTRUM ANALYSIS OF A 'C2' NOTE

- Basso Bravo strengthens the fundamental
- Allows the lower tones of the marimba to project their clarity even during contrapuntal and multiple line compositions.
- The Basso Bravo Sound carries clearly while enhancing the warmth and color that define the Marimba One keyboard.
- By focusing the fundamental of each note, we have created the most articulate bass sound available.

*Focused Fundamental,  
Warmer, Darker Sound,  
Louder Bass*

### Keyboard Voicing

#### Enhanced Premium

*The Artist's Choice*

Enhanced Premium keyboard voicing is comprised of highly select rosewood bars; the very few and finest we encounter from the thousands we produce. These bars feature elongated ring time and extraordinary warmth and clarity.

Enhanced Premium voicing melds mother-nature's most nuanced efforts with our quest for the perfect keyboard, supporting the ultimate expression of the artist.

#### Enhanced Traditional

*The University & Orchestra Preference*

The Enhanced Traditional Voicing is more resonant, with an even darker bass end, than our Traditional Keyboard Voicing. It is exceptional in terms of its projection, evenness and balance.

#### Traditional Keyboard

*The Standard of Excellence*

The Traditional Keyboard Voicing features a bright and clear upper end, an even balanced middle section, and a dark, strong bass end. This keyboard is the original, defining sound of Marimba One.
